Rapid Bounds on Electrostatic Energies Using Diagonal Approximations of Boundary-integral Equations	9
ISAR Simulations of Complex Objects and Verification with Measurements at TUBITAK MRC	19
Investigating Energetic and Impedance Relations of Microwave Transmission Line Filled with Dielectric Material	23
Electromagnetic Field Analysis in Permanent Magnet Retarder Based on Finite Element Method	28
Simulation of 3D Laser Imaging	33
Studying the Effects of Wind Farms on a Terrain to the Scattered Field by Utilizing the ISAR Concept	38
FDTD Analysis in a PCB Stripline Structure	42
Magnetic Field Distribution of a Novel Variable Inductor Based on Orthogonal Magnetization	46
Polarimetric UHF Calibration for SETHI	50
Towards a Polarimetric SAR Processor for Airborne Sensor	55
Polarimetric SAR Image Classification Using Radial Basis Function Neural Network	60
A Fully Polarimetric Borehole Radar Based Numerical Modeling: Fully Polarimetric Response to Synthetic Natural Fractures	66
A New Method of Near-field Three Dimensional Synthetic Aperture Radar Imaging	71
Wide Band Radar with Detecting and Tracing Corona Arc around Any High Speed and Anti Radar Aircraft	75
Matrix Calculation and Compensation of Multiple CFO Interferences in the OFDMA Uplink Communication System	81
Threshold Power-based Radiation Pattern Measurement of Passive UHF RFID Tags	87
Energy Efficient Fuzzy Logic Based Intelligent Wireless Sensor Network	91
Rain Fade Modelling Using Hidden Markov Model for Tropical Area	96
Power Control and Diversity Performance Analysis in CDMA Systems	101
A Novel Power Controller of Wireless Sensor Network Node Circuit for Energy Saving	107
A UHF and HF RFID Integration System for Access Control Application	111
Fast Integral Equation Solution Techniques for Planar-3D Structures in Multilayered Media	115
Staggered Grid Pseudo-spectral Time-domain Method for Light Scattering Analysis	121
Application of Alternating Direction Implicit (ADI) Algorithm to Staggered-grid PSTD Modeling of Electromagnetic Waves	125
Discussion of Reverberation Chamber Uniformity Using Neural-network Method	131
Application of EH4 in the 102 Ore Belt in Shihu Gold Deposit of Western Hebei, China	135
Propogation of an Electromagnetic Beam at the Interface of Isotropic Medium and Gyroelectric Medium	139
On the Vision of Depth	145
Analysis of Coupled Nonuniform Transmission Lines as an Initial Value Problem	150

Synthesis about Analytical Approaches for Calculating the Magnetic Field Produced by Permanent Magnets of Various Topologies	154
Film's Forming Materials for THz Spectral Range Purposes	159
Wave Propagation in Corrugated Circular Grating	163
Frequency Selective Surfaces with Thin Triangular Conducting Elements	166
A New Phase Measurement Technique for RF Power Amplifier Only Measuring Magnitudes	170
Structure Improvement for Suppressing High Mode of Folded Waveguide Traveling Wave Tube	174
Size Reduction and Harmonic Suppression of Narrow Bandpass Waveguide Filters Using Nonuniform Waveguides	178
An Asymmetric Dual-band HTS Band-pass Filter for American Mobile Phone System	183
A New Algorithm about Extrapolating Near Distance Field to Far-field of Large Size Antenna	187
Design of Multi-band Antenna Using Sperrtopf	191
Radiation Patterns of Circumferential-spherical Arrays of Circular Patches	195
Design of Low-cost Antennas for Globalstar Applications	200
Miniaturization of a Ultra Wide Band Antenna	204
Bandwidth Estimating Strategy for a 2-Layer Rectangular Suspended Microstrip Antenna	208
An Effective Strategy for Designing Probe-fed Linearly-polarized Thick Microstrip Arrays with Symmetrical Return Loss Bandwidth	212
Structural Analysis of the Microstrip Sample Holder	217
Novel Application of CPW in Antenna Design for Dual-frequency Operation	221
Ground Slotted Landa Shape Single Feed UWB Circular Polarized Antenna for 2.4 GHz RFID Reader	225
Ground Slotted Phi Shape UWB Stacked Circular Polarized Antenna for 5.8 GHz RFID Reader	230
An Electromagnetic Target Classification Method for the Target Sets with Alien Target: Application to Small-scale Aircraft Targets	235
Unsupervised Electromagnetic Target Classification by Self-organizing Map Type Clustering	240
Computing the Magnetic Induction Field Due to a Radially-magnetized Finite Cylindrical Permanent Magnet by Employing Toroidal Harmonics	244
Ultra Wide Band Communication through Plasma Generated by Corona Effect around High Voltage Line	252
Novel GLLH EM Cloak with Front Branching and without Exceed Light Speed Violation	260
Three Dimensional Imaging and Focusing of Ground Penetrating Radar Data	266
A Variable Step Size Algorithm for Blind Equalization of QAM Signals	271
Metamaterial Hat	276
The Influence of Electric Field on Magnetic Vortices in Confined Magnetic Structures	280
A Novel and Reliable Method for Bandwidth Expansion in Microstrip Array Antenna	283
A Highly Efficient Doherty Power Amplifier with Impedance Transform	287
Comparison of Bit Error Rate for Propagation Mechanisms of Millimeter Waves in a Practical Communication Systems Employing PSK and FSK	292
Using Parallel Computing for Adaptive Beamforming Applications	296
Permanent Magnet Synchronous Motor Decoupling Control Study Based on the Inverse System	300
Modeling Buck Converter by Using Fourier Analysis	304
The Comparison of Direct and Indirect Matrix Converters	310
Design of a High Speed Universal Motor for Organic Agriculture Applications	314
Shielded and Unshielded Three-conductor Transmission Lines: Modeling and Crosstalk Performance ..	318
Side Effect Characterization of EBG Structures in Microstrip Patch Antenna	323

The Eigenvalues of Quantized Spin Waves and the Uniaxial Anisotropy in a Biferromagnetic System ..	327
Structure Optimization for Magnetic Equipment of Permanent Magnet Retarder Using ANSYS	332
Analysis of Drilling Parallel Horizontal Twin Wells Rotating Magnetic Beacons Magnetic Field Strength Size in SAGD	336
Full-wave Equivalent Circuit of Planar Multilayer Structures for Remote Sensing Applications	341
Tumor Classification Using Radar Target Signatures	346
Optimizing Windows Security Features to Block Malware and Hack Tools on USB Storage Devices ...	350
Evaluated the High Rang Resolution Profile Identifying Simulation by Laser Radar of the Rotation Targets	356
Problems of Statistical Decisions in Ocean Monitoring	361
An Adaptive Spectroellipsometric Identifier for Ecological Monitoring of the Aquatic Environment ...	365
A Uniform Asymptotic Solution for Diffraction by a Right-angled Dielectric Wedge	369
Diffraction by a Double-negative Metamaterial Layer with PEC Backing	373
A Novel Four-port De-embedding Method and the Parametric Extraction of MOSFETs	377
The RF I-V Curve for PHEMT through the Small Signal <i>S</i> -parameter Extraction Method	381
A Novel H-shaped Slot-coupled Antenna for the Integration of Power Amplifier	385
Review of 3D EM Modeling and Interpretation Methods for Triaxial Induction and Propagation Resis- tivity Well Logging Tools	390
Nitsche-type Mortaring for Maxwell's Equations	397
Correction for the Borehole Effect of Multi-component Array Induction Log Data	403
Determination of Dip and Anisotropy from Multi-frequency Tri-axial Induction Measurements	410
Measuring the Soil Water Content of a Sandy Soil with a Frequency Cross-hole Radar: Antenna Design and Experiments	415
Focusing Microprobes Based on Integrated Chains of Microspheres	419
Sensorless Control of Permanent Magnet Synchronous Motor Using Luenberger Observer	424
Control Algorithms of Active Power Filters	429
Compatibility of Different Types of Frequency Converters with Supply Network	434
Leakage Inductance Determination for Transformers with Interleaving of Windings	439
Controlled Battery Charger for Electric Vehicles	444
Modeling the Electromagnetic Behavior of Power Converters	449
Frequency-adjustable Circularly-polarized Ceramic Dielectric Resonator Antenna	454
Effects of Metallic Strips on the Radiation Characteristics of Dish Reflector Antennas	458
The Gain Effects of Air Gap Quadratic Aperture-coupled Microstrip Antenna Array	462
Polarization Diversity Monopole Antenna	466
Effective Parameters of Artificial Material Composed of Dielectric Particles	470
Franck-Hertz Experiment in Magnetic Field	475
Coordinate Transformations with Variable Speed of Light	480
Radiometry, Wave Optics and Spatial Coherence	485
Homogeneous Bianisotropic Medium, Dissipation and the Non-constancy of Speed of Light in Vacuum for Different Galilean Reference Systems	489
Enhanced Gain Planar Inverted-F Antenna with Metamaterial Superstrate for UMTS Applications ...	494
Temporal Filtering in Phase-space	498
Temporal Zone Plate by Linear Chirp Generator	501
Second Order Moments of Superpositions of Hermite-Laguerre-Gauss Modes	505

The Phase-space Interpretation of Self-imaging and the Phase Retrieval Problem	509
Digital Holography in the Light of Phase Space	514
Wigner Based Phase Space as a Tool to Analyze Super Resolved Imaging Configurations	519
Tomographic Reconstruction of the Wigner Distribution of Non-separable Beams	526
Tunable Phase Masks for Extended Depth of Field	531
Equivalent Circuit Models for Split-ring Resonator Arrays	534
Effects of Substrate Parameters on the Resonance Frequency of Double-sided SRR Structures under Two Different Excitations	538
Transmission through Kerr Media Waveguide Barriers: Dispersive Properties	541
Photonic Crystal Fiber Analysis Using Cylindrical FDTD with Bloch Boundary Conditions	546
Energy Band of Spin Waves in Ferromagnetic Bilayers with bcc Structures	551
Analysis Propagation Characteristics of the Surface Plasmon Polariton Trench Waveguides by Method of Lines	555
General Study on Coherent Beam Combining of Interferometric Fiber Laser Arrays	560
The Effect of Temperature on the Soliton Propagation in Photorefractive SBN Crystal in One Dimension	564
Calculating Complex Propagation Constants of Finite-size Two Dimensional Photonic Crystal Waveguides	567
Level Set Method in EIT Image Reconstructions	571
An Effective Detection of Conductivity Changes in Biologic Tissue	575
Monitoring of Diseases Progression by MR	580
Photodynamic Therapy in the Dermatological Field and Enhanced Cutaneous Absorption of Photosensitizer	583
Developments of Transdermal Transport System during Skin Iontophoresis and Electroporation	588
Comparing Effects of Extremely Low Frequency Electromagnetic Fields on the Biomass Weight of C3 and C4 Plants in Early Vegetative Growth	593
Measurement of Complex Permittivity of Biological Tissues	599
A Feasibility Study of Land CSEM Reservoir Monitoring: The Effect of the Airwave	602
3D Modeling of Novel Focused Source EM Survey versus the Standard CSEM	607
Inversion of 3D Marine CSEM Data Using Seed-type Initial Models	613
Simultaneous Joint Inversion of Seismic and Magnetotelluric Data for Complex Sub-salt Depth Imaging in Gulf of Mexico	617
Closed-form, Bistatic, 3D Scattering Solution for a Dihedral Corner Reflector	621
New Scheme for Radar Target Identification via Target's Internal Modes	626
Multi-temporal Hyperspectral Images Unmixing and Classification Based on 3D Signature Model and Matching	630
A Telemetry Antenna System for Unmanned Air Vehicles	635
Defected Ground Structure for Coupling Reduction between Probe Fed Microstrip Antenna Elements	640
Author Index	645

Contents

Optimization of Aperture Coupled Microstrip Patch Antennas	657
Use of Attachment Functions in the Moment Method for Analysis of Planar Microstrip Structures	661
GA Optimization for Compact Broadband PIFA Application	666
Numerical Computation of Capacitance of Oblate Spheroidal Conducting Shells	670
Guided and Leaky Modes of Planar Waveguides: Computation via High Order Finite Elements and Iterative Methods	676
A Closed Form Solution for Longitudinally Inhomogeneous Waveguides	681
Simulating Dispersive Left-handed Media with the TLM Method	686
Sensitivity Analysis of Pulse Broadening in Optical Fibres; A Stochastic Approach	692
Stress and Strain Sensing with Multimode POF Bragg Gratings	696
Novel Composite Non Reciprocal Right/Left-handed Line Made from Ferrite Material	700
A New Profile for Metal Post Circular Waveguide Polarizer	703
A Parallel Adaptively Modified Characteristic Basis Function Method for Analyzing Electromagnetic Scattering Problems	706
Wireless Mass Sensor System with Four Mixers Structure Based on FBAR	710
Design and Simulation of Low Noise Amplifier for Radio Frequency Front End of Wireless Communication	714
A Chaos Based Waveform Approach to Radar Target Identification	719
Using Chaos to Detect IIR and FIR Filters	723
Development of Polarimetric Ground Based-SAR System with Compact VNA and Vivaldi Antenna Array	728
Full Polarimetric Calibration of Ground Based-SAR System with Thin Wire	732
Input Characteristics of Coated Thin Wire Helix Antenna	737
Antenna Design for a Portable RFID Reader	742
Characterization of Microwave Thin Radar Absorber Composed of Hexagonal Patch Array	746
Microstrip Array Antenna with New 2D-Electromagnetic Band Gap Structure Shapes to Reduce Harmonics and Mutual Coupling	750
Integrated Design of Multiple Antennas for WiFi/Bluetooth/GPS Mobile Communication	755
Increasing Integration in Composite Patch Antenna Arrays for Dual-band and Dual-polarized Uses ...	759
Novel MEMS Dipole/Monopole Antenna for Wireless Systems Operating at 77 GHz	765
Fast Electromagnetic Modeling of 3D Interconnects on Chip-package-board	769
An \mathcal{H} -LU Based Direct Finite Element Solver Accelerated by Nested Dissection for Large-scale Modeling of ICs and Packages	774
Application of Two Mixed Potential Integral Equations to Electromagnetic-circuit Simulation of Three-dimensional Interconnects in Layered Media	779
Spectral Shift of an Electromagnetic Gaussian Schell-model Beam	785
A Fiber Optic Evanescent Wave Sensor for Measuring Refractive Index Change of Liquids	790

Ultrasonic Wave Detection in Atmospheric Pressure Plasma Using Fraunhofer Diffraction Effect	794
Dielectric-dielectric Composite Photonic Crystals for Negative Refraction of Unpolarized Electromagnetic Waves	798
Light Scattering from 3-D Nanoscale Disordered Media	804
Analysis of Dispersion Properties of Waveguide Based on Metamaterials	809
Stability of Bragg Grating Solitons in a Cubic-quintic Nonlinear Medium with Dispersive Reflectivity ..	813
The “Missing Mass” in the Universe May Be Represented by the Dynamic-mass of the Photons	816
The Inflationist Expansion of the Universe Was Conducted by Very High Energy Photons	819
Self-field Theory — A Possible Gravitational Structure for Galaxies	823
Self-field Theory-biodiversity May Be a Resonance Process	828
Self-field Theory-biophotons and EPR	832
Subsurface Sub-terahertz and Terahertz Tomography	836
Advanced Studies of the Differential Phase Shift in the Azimuthally Magnetized Circular Ferrite Waveguide	841
Research of a Solid Object Impacting on the Water Surface	846
A Rectangular Patch Antenna Technique for the Determination of Moisture Content in Soil	850
Monitored Solar Cycle in Relation to an Approximated Model	855
Satellite Monitoring of Lunar Shadow on the Earth at Solar Eclipse	858
Monitored Solar Cycle in Relation to Sea Surface Temperature at Azores in the Northeast Atlantic Ocean	861
A Pattern Synthesis Technique for Multiplicative Arrays	864
Interleaved Array Antennas Design — (Almost) Deterministic Strategies	868
A Complete MIMO System Built on a Single RF Communication Ends	873
Artificial Magneto-superstrates for Gain and Efficiency Improvement of Microstrip Antenna Arrays ...	878
Rectangular Ring Antenna for On-body Communication System	882
A New Fractal Antenna for Super Wideband Applications	885
Koch Fractal Antenna for UWB Applications	889
Miniaturized RF MEMS Switch Matrices	892
Spectrally Coded Multiplexing Based on FBG Pairs	896
Bioelectrical Impedance Analysis by Multiple Frequencies for Health Care Refrigerator	900
Simulations of Multi-Photon Absorption Spectra for Fullerene Derivatives $C_{60} > C_2H_4NH_3(Polyaniline)_n$ Based on First-principle Calculations	906
Computational Modeling of Electromagnetically Induced Heating of Magnetic Nanoparticle Materials for Hyperthermic Cancer Treatment	910
The Effects of Breast Tissue Heterogeneity on Data-adaptive Beamforming	915
Numerical Simulation of Inductive Phase Shift Due a Brain Hematoma	921
Microstrip Antennas for Direct Human Skin Placement for Biomedical Applications	926
Design of Small-sized and Low-cost Front End to Medical Microwave Radiometer	932
The Application of the Hilbert-Huang Transform in Through-wall Life Detection with UWB Impulse Radar	937
Compressive Through-focus Imaging	942
A Krylov Subspace Approach to Parametric Inversion of Electromagnetic Data Based on Residual Minimization	947
Antenna Modeling Issues in Quantitative Image Reconstruction Using a Flexible Microwave Tomography System	952
