Contents

Bragg Grating Solitons in Semilinear Couplers with Dispersive Reflectivity ........................................... 15
Dynamic Frequency Response of Charged Chiral Rods ................................................................. 18
Segmentation of OPG Images in Studying Jawbone Diseases ......................................................... 21
An Improved Segmentation of Brain Tumor, Edema and Necrosis ................................................... 25
Bone Marrow Analysis in Multi-contrast MR Images ....................................................................... 29
Stochastic Models of Electrodynamics and Numerical Models ..................................................... 33
Stochastic Description of Wireless Channel for Cognitive Radio ................................................... 38
Statistical Evaluation of Diffusion-weighted Imaging of the Human Tissues ............................... 43
Software for Partial Discharge and Localization ............................................................................. 48
Automatic Detection and Segmentation of the Tumor Tissue ....................................................... 53
Study of the Influence of Magnetic Fields on Plants Tissues .......................................................... 57
Combined X-ray Diagnostics of Heterogeneous Biological Material ............................................. 61
Miniature Planar Triple Passband Filter Using Embedded Resonators ....................................... 66
Design of Planar Single-section and Cascaded Directional Filters ............................................... 70
Wideband Planar Filter Using Signal-interference Techniques ..................................................... 76
Planar Bandpass Filter Design Using Transversal Filtering ............................................................ 80
Performance of MIMO RADAR Using Two-way MUSIC ............................................................... 84
On Multi-antenna Systems for Wireless Transmission Mediums ................................................... 88
On the Multihop Relays with Multiple Antennas for LTE-A ............................................................ 95
Channel Capacity Improvement Dependency of the Number of Receiving Antennas for Aeronautical
MIMO Systems ................................................................................................................................. 101
MIMO SC-FDE Transmission Techniques with Channel Estimation and High-order Modulations .... 105
Single-stream Communication Using Orthogonal Signal Division Multiplexing with Multiple Antennas 113
General Ray Method for Solution of Dirichlet Boundary Value Problem for Helmholtz Equations .... 117
High Resolvability of Electrical Tomography Based on General Ray Method ................................ 121
Fast Numerical Solution of Dirichlet Boundary Problem for Laplace Equation in 3D Domains with Com-
plicated Geometry ............................................................................................................................. 124
Electromagnetic Eigen-field Characteristics of Acousto-optic Waveguides with Transverse SAW .... 129
Permittivity Determination of Multi-sectional Diaphragm with Metamaterial Layers in Rectangular
Waveguide ........................................................................................................................................ 135
Multi Bands Reconfigurable Antenna for Mobile Phone Application .......................................... 140
Reconfigurable Antenna with Tri-polarization Capability .............................................................. 143
Analysis of Phase Range Distribution of Different Reflectarray Elements on Polycrystalline Silicon Cell 147
Photon Generation from Quantum Vacuum Using a Josephson Metamaterial .................................. 151
Filtration Properties of a System for the Measurement of Air Ions ............................................... 154
A Comparison of the Dynamic Range of FDNR Building Blocks .................................................. 159
Analysis of Leap-frog Filter in the Programme NAF ................................................. 163
Application of the Level Set Method in MR-EIT Inverse Problems ................................. 167
Influence of Initial Conditions on Conductivity Calculation via the MR-EIT Inverse Problem ......................................................... 171
EM Field and Biological Systems Interactions .................................................................. 175
Electromagnetic Modeling and Simulation for Interconnect Structures Based on Volume-surface Integral Equations ................................................................. 179
Refractive Index Profiling of Metal-diffused Planar Waveguides Using a Differential Near-field Optical Microscopy .............................................................. 183
Interference Cancellation and DOA Estimation by Generalized Receiver Applying LMS and MUSIC Algorithms ................................................................. 187
Rain Attenuation Prediction Using Frequency Scaling Technique at Tropical Region for Terrestrial Link ................................................................. 191
New Indoor Propagation Channel Model for Location Purposes ........................................ 195
Access Point Selection for WLAN Indoor Localization Systems Using RF Walk Test Data ................................................................. 199
Evaluation of Singular Potential Integrals with Linear Source Distribution ........................ 203
A Multi-arm Coupled-fed Monopole Antenna for WWAN Mobile Systems ...................... 208
Design of Two-layer Hemispherical Dielectric Resonator Antenna .................................. 213
Use of Transparent Dielectric Resonator Antenna as a Light Cover .................................. 216
A Compact Loop Antenna with Parasitic Split Ring for UHF RFID Application .................. 219
Compact Size Antenna for Car FM Radio ............................................................................ 223
Gain Enhancement of Circularly Polarized Slender Antenna Using a Wider Helical Element ................................................................. 225
Resonantly Confined Modes in Optical Fibers with Circularly Aligned High-index Rods .......... 228
Terahertz Metamaterial Absorbers for Sensing and Imaging ............................................. 232
Operational Slow Line Underpinned by a 1D Metamaterial .............................................. 236
An Optimized Design of Cylindrical Acoustic Cloak with Two-phase Isotropic Layered Composites .................................................................................. 241
3D Active Imaging Models and Systems to See through Adverse Conditions: Application to the Surveillance of an Aircraft Environment .......................................... 246
A Multi-scale SAR Segmentation Based on Hierarchical Merging ...................................... 251
New SAW Odor and Gas Sensor for Sensor Network Installed in Smart House .................. 255
Checking of Combustion Chamber of Liquid Rocket Using ECT with AMR Sensor ............ 261
Prediction of Radar Reflectivity along Radio Link ............................................................... 264
Time Domain Transient Analysis of Electromagnetic Field Radiation for Phased Periodic Array Antennas Applications ................................................................. 268
Multiphysics Analysis for Electromagnetic Radiation by Elastic Media .............................. 272
Input Impedance Measurement for Balanced Antenna by S-parameter Method .................. 276
Near-field Magnetic Probe Method Predicting Far-field Measurements — Correlation of Dipole Boresight Measurements with Anechoic Range Model ................................ 280
Effects of Residual Stress on Assembled SAW Strain Sensors ............................................. 286
Design of Second-order Inductive-coupled Resonator-based Bandpass Filter with Controllable Multiple Transmission Zeros ......................................................... 291
Design of Dual-band Coupling Matrix-based Matching Network ........................................ 295
Design and Characterization of Cryogenic Wideband LNA Using WIN 0.15 µm GaAs pHEMT Process ................................................................. 300
Evaluation of Nonlinear Effect Impact on Optical Signal Transmission over Combined WDM System ................................................................. 303
Performance Improvement of Spectrum-sliced Passive Optical Network .......................... 308
Design of an Optimal Benes WEX Architecture Based on Sufficient Permutations ................ 312
Analysis of Anisotropic Diffraction in Volume Gratings Using Liquid Crystal Composites .................. 317
Universal Properties of Electromagnetic Beams .......................................................... 464
Wide Band Open Ended Air Gap RLSA Antenna at 26 GHz Frequency Band ............... 470
Design of Wideband Monopole Antennas Using a Simple Tapered Feed Line and Slot .... 474
A Grounded CPW Transparent UWB Antenna for UHF and Microwave Frequency Application ........ 479
A Printed Dipole Antenna with U-line Matched for Dual-band WiFi Applications .......... 482
Compact Dual-band Monopole Antenna for 2.4/3.5 GHz WiMAX Applications .......... 487
Dual-band Transparent Antenna for ISM Band Applications ........................................ 490
Developing Alternatives of Small Monopole Antenna Design for Achieving 4G-LTE Requirements in a Limited Antenna Size ................................................................. 494
Investigation on CPW Koch Antenna Durability for Microwave Imaging ................... 498
P-shape Monopole Antenna Design for WBAN Application ......................................... 502
Can There Be WDM Solitons in Fibers? .................................................................. 506
Investigation of Two Bidirectional C + L Band Fiber Amplifiers with Pumping Sharing and Wavelength Reused Mechanisms .......................................................... 510
Optical-circulator-based Single-frequency Fiber Laser Using Absorber and Subring Cavity in the Linear Cavity ......................................................................................... 515
Generation of Terahertz, Microwave, Radio Waves from a Laser-excited Wire Antenna 519
Arc-induced Long Period Fiber Gratings Based on Flat-clad Fibers .............................. 525
Transmitted Characterization of 625 Mbps/15 GHz ROF Signal Using a Direct Modulated Baseband Signal and Twice Optical Carrier Suppression Modulation .................. 528
A Fault-tolerant Mechanism on Star-ring Based Ethernet Passive Optical Networks .... 532
A New Mechanism to Improve Bandwidth Utilization and QoS of IPTV in Ethernet Passive Optical Network ............................................................................................... 537
The Influence of the Electromagnetic Wave on the Nonlinear Quantum Acoustoelectric Current in a Quantum Well ................................................................. 541
Dyson Equations for Dense Random Media Composed of Dielectric or Metallic Nanoscale Scatterers ... 548
Analysis of Parameter Sensitivity of Electromagnetic Railgun System ....................... 552
Analysis of Approaches for Modeling the Contact Resistance on Conductor Interface by the Finite Element Method .......................................................... 556
Analysis of the Electric Field Environment around Railway Platform ....................... 561
The Multi-component Signal Model and Learning Algorithm of Blind Source Separation 565
Near-weightlessness Movements in Electromagnetic Fields ........................................ 570
Focusing on the Moiré Effect .................................................................................... 575
Response of Multilayer Materials to Electromagnetic Waves ...................................... 580
Analysis of Distortion Factor of Three Phase Linear Synchronous Motor .................... 584
Simulation of 3-D SAR Imaging Based Outdoor RCS Measurement Technique ........ 589
GRECO Based Spotlight SAR Imaging Simulation Method ....................................... 594
Bridgeless SEPIC-derived LED Driver without Electrolytic Capacitor for Multistring Application .... 599
Investigation of Irregularities Induced from Medium-scale Traveling Ionospheric Disturbances Using Global Positioning System and Digisonde .......................... 604
A Study of Equatorial Ionospheric Irregularities over the Indian-Ocean Sector during Solar Maximum by Using the Global Positioning System .......................... 608
Satellite Monitoring for Elasto-plastic Behavior of Plate around Epicenter in a Process Tsunami Earthquakes .......................................................... 612
A Geomagnetic Polar Drifting Path Evolution on the Geographic Earth Surface ........ 616
Electromagnetic Process at a Crustal Fault Formation for Tsunami Earthquake on the Planet Earth . . . 619
Scattering of Light from Rough Surfaces, the Limits of Validity of Geometric Optics Approximation Method .................................................................................................................. 623
Modulation in the Spectral Degrees of Polarization of Stochastic Electromagnetic Higher-order Bessel-Gauss Pulsed Beams ........................................................................................................ 626
Weighted Multi-frequency Imaging of Thin, Crack-like Electromagnetic Inhomogeneities ................. 631
Estimating Properties of Subsurface Layers from GPR Spectral Attributes .............................................. 636
Identification of Subsurface Thin Layers Using Cepstrum of GPR Data ................................................ 640
Design and Implementation of a Variable-frequency Multiphase VRM with Optimized Phase-reduction Control .......................................................................................................................... 697
An Adaptive Current-sharing Control Technology for Multi Power Module with Hot Swapping ........ 702
Implementation and Study of Super-capacitor Cell Power Management System ................................. 705
Design and Implementation of an LED Switching Regulator Using Inverse Buck Topology .................. 709
Efficient Solutions of Volume Integral Equations with Inhomogeneous Materials ............................... 713
Electromagnetic Scattering from Aggregates Embedded in Absorbing Media .................................... 717
A New Parallel Version of the DDSCAT Code for Electromagnetic Scattering from Big Targets .......... 722
Analysis of Electromagnetic Scattering from Absorptive Dielectric Rough Surfaces with Underneath Target .................................................................................................................................. 727
Investigating the Radar Returns of a Wind Turbine .............................................................................. 730
Tapered Fiber Mach-Zehnder Interferometer for Liquid Level Sensing ............................................... 734
Reflection and Transmission Characteristics of Lattice Grid with Lossy Clad for Optical CT .................. 737
Reconstruction of Dielectric Objects by Solving Volume Integral Equations with Tetrahedral Discretization ........................................................................................................................................ 743
Low SAR, Compact and Multiband Antenna ......................................................................................... 748
Creeping Wave Antenna Design and Application for On-body Surface Communication ..................... 752
Compact Folded Meander PIFA Antennas in MedRadio Bands ............................................................. 756
Metamaterial Loaded Wideband Patch Antenna ..................................................................................... 760
Wideband Small Loop-monopole HF Transmitting Antenna with Implications for Maxwell’s Equations and the Chu Criterion ........................................................................................................ 764
Performance Characteristics of Loop Antennas above a Ground Plane of Finite Extent ...................... 769
Design and Analysis of a Stripline Archimedean Snail Antenna ............................................................. 775
Mobile Mouse Pad ................................................................. 936
An ECG Signal Enhancement Based on Improved EMD ......................... 940
A Rehabilitation Device for the Patients of Carpal Tunnel Syndrome ............ 944
Estimation of Rain Attenuation at C, Ka, Ku and V Bands for Satellite Links in South Africa ................. 948
Computation of Rain Attenuation through Scattering at Microwave and Millimeter Bands in South Africa ................................................................. 959
Six-port Based Wave Correlator with Application to Micro-displacement Measurement ................................................................. 972
Uncertainty in Waveguide Vector Network Analyzer Measurements in the Frequency Range of D-band (110 GHz to 170 GHz) .................................................. 976
The Progress of Unmanned Aerial Vehicle Synthetic Aperture Radar Development for Environmental Monitoring ................................................................. 983
Development of an Integrated Velocity Compensation Timing and Control Unit for SAR .................. 987
Design and Development of a Sidelooking Microstrip Patch Antenna for Unmanned Aerial Vehicle Synthetic Aperture Antenna ................................................................. 991
High Speed AD DA for Synthetic Aperture Radar .................................................. 994
Realization of Interpolation-free Fast SAR Range-Doppler Algorithm Using Parallel Processing on GPU ................................................................. 998
Performance Analysis of DPCA Based SAR Moving Target Detection ............ 1003
Microstrip Slot Antenna for Mobile Base Station .................................................. 1007
Resonance Absorption in Multilayered Bi-gratings .................................................. 1011
Applications of the High-order Method in Dielectric Material ......................... 1016
Assessment of Decoupling between MRI Array Elements at 300 MHz ............... 1020
Circularly Polarized Patch Antenna Based on Chiral Metamaterial .................. 1025
Simulation of the Noise Induced by Corona Discharges on a Ground VHF Antenna ................................................................. 1028
Novel Design of Site Source for Radiation and Conduction Emission Test ........ 1033
The Analysis of Antenna Performance due to PCB Grounding Effect from the EMC Bead Device .................. 1036
A Low Cost Elliptical Dipole Antenna Array for 60 GHz Applications ............... 1044
Reconfigurable Monopole Antenna for WLAN/WiMAX Applications ............... 1048
RF Transmit Performance Comparison for Several MRI Head Arrays at 300 MHz .................. 1052
Pulse Train Distributed Magnetic Field Generated from High Strength Concrete Using Magnetized Olivine Stone Aggregate ................................................................. 1057
Arousal Effect of Physiological Magnetic Stimulation on Car Driver’s Pit of Stomach Evaluated with Electroencephalogram Using Driving Simulator ................................................................. 1061
Speed-feedback, Direct-drive Control of a Low-speed Transverse Flux-type Motor with Large Number of Poles for Ship Propulsion ................................................................. 1066
A 2.4 GHz Array Combination High-power Amplifier ........................................ 1071
Design and Optimization of Carrier Suppression Circuit for UHF RFID Reader Applications .................. 1075
Implementation of a Compact RF Module by Analysis and Fabrication for Organic Substrate with Embedded Passives ................................................................. 1080
Propagation Characteristics of the Meandered Defected Ground Structure ........ 1084
Wideband Leveling Amplifier Design Using 0.18 μm CMOS Process ............... 1088
FPGA Implementation and Verification of Reed-Solomon Code in SDR System .................. 1091
Design of a Bandwidth-enhanced Ultra Thin Metamaterial Absorber ............... 1097
