

# Contents

Plasmon-resonant Microchip Emitters and Their Applications to Terahertz Spectroscopy .....	11
Terahertz Quantum-cascade Laser and Its Applicability to Ultra-high Bit-rate Wireless Access System	16
Photonic Integration with Si-wire Waveguides for Photonic Networks .....	20
Technical Trends in Millimeter-wave Band Radio-On-Fiber Access System .....	24
Radio on Fiber Technologies and Their Application toward Universal Platform for Heterogeneous Wireless Services .....	28
Experimental Demonstration of a Radio on Free Space Optics System for Ubiquitous Wireless .....	34
Radio on Leaky Coaxial Cable (RoLCX) System and Its Applications .....	40
Exploring Sub-THz Waves for Communications, Imaging, and Gas Sensing .....	42
Real-time Visualization of W-band Millimeter Wave by Live Electro-optic Imaging .....	48
Dissipative Breathers in rf SQUID Metamaterials .....	52
Tunable Dynamic Capacitance Arising from Coulomb Blockade in a 2D Nanoclusters Assembly .....	57
Cherenkov Radiation in a Waveguide Partially Loaded with Anisotropic Double-negative Metamaterials	62
Review of Cherenkov Radiation in Double-negative Metamaterials .....	65
Introduction to the Re-locatable Atmospheric Observatory in China .....	68
An Investigation on Properties of Ionospheric Es in Hainan Region .....	74
Comparison of Simultaneous Wind Measurements Using Colocated All-sky Meteor Radar and MF Spaced Antenna Radar Systems .....	79
Peculiarities of the Spatial Spectrum of Scattered Electromagnetic Waves by Anisotropic Collisional Magnetized Turbulent Plasma Layer .....	85
Effect of Rainfall on Millimeter Wavelength Radio in Gough and Marion Islands .....	91
Comparison between Mixing and Pure Walfisch-Ikegami Path Loss Models for Cellular Mobile Communication Network .....	99
Variation of Gravitational Mass in Electromagnetic Field .....	105
Observation of a Non-conventional Influence of Earth's Motion on the Velocity of Photons, and Calculation of the Velocity of Our Galaxy .....	108
Determination of Speeds of Light in Vacuum for Different Galilean Reference Systems .....	115
Tunable TE/TM Wave Splitter Using Symmetric Gyrotropic Slab .....	120
A New Algorithm for Electrical Impedance Tomography Inverse Problem .....	127
FEM Analysis of HF Magnetic Field Deformation Near Conductive Samples .....	132
Utilization of Faraday Mirror in Fiber Optic Current Sensors and Experiments .....	137
Change Detection in the Video Sequences with Small Density of Information .....	142
A Numerical Model of Relativistic Pulsed Power Generator .....	147
Tuned Structures for Special THz Applications .....	151
Improving of Ray-tracing Method for Numerical Modeling of Lighting Systems .....	156
Segmentation of NMR Slices and 3D Modeling of Temporomandibular Joint .....	160

Absorbing Properties of Frequency Selective Surface Absorbers on a Lossy Dielectric Slab .....	165
Waveform Parameter Estimation and Dispersive Material Characterization .....	169
Global and Local Field EM Modeling for PHC Dispersion and Metamaterial Cloak Design .....	176
Highly Birefringent Bragg Fiber with a Fiber Core of 2-dimension Elliptical-hole Photonic Crystal Structure .....	185
Tunable Y-shaped Waveguides in Two-dimensional Photonic Crystals .....	189
A Novel Fiber Sensor Based on a Bragg Fiber with a Defect Layer .....	193
Higher Order Finite-difference Frequency-domain Analysis of Two-dimensional Photonic Crystals with Arbitrary Shapes .....	197
Band Structure Analysis of Liquid-crystal Photonic Crystal Fibers .....	201
Poled Thick-film Polymer Electro-optic Modulation Using Rotational Deformation Configuration .....	205
Aspects Regarding the Adapting and Optimization of Mixed Drying Systems Microwave-hot Air for the Processing of Agricultural Seeds .....	210
A Passive Optical Location Implemented on the One-board Computer .....	214
The Meaning of the Lightspeed on the Basis of Its Determinations .....	219
Lateral Displacements of an Electromagnetic Beam Transmitted and Reflected from a Gyrotropic Slab .....	226
Electromagnetic Interference Modeling Research on the Electrical Machine and Converter Systems .....	235
Transient Field Distribution in a Transformer Affected by Variably Loaded Secondaries .....	239
Research on Arch Method for Testing the Absorbing Capability of Absorbing Materials .....	244
Progress in Studies of Transients Analysis Method of Multiconductor Transmission Lines .....	249
Efficient Calculation of Vehicular Antennas' Radiation Patterns .....	254
Analysis of Vehicular Wire Antennas Using MoM .....	257
Inverse Problem of Multiple Objects Buried in a Half-space .....	261
Forward Modeling of High Frequency Magnetotelluric Using Finite Element Method .....	265
A Three Dimensional FEM-BEM Approach for the Simulation of Magnetic Force Microscopes .....	272
A General ADE-FDTD Algorithm for the Simulation of Different Dispersive Materials .....	278
FDTD Analysis of a Nonlinear Transmission Line .....	282
Combined RKDG and LDG Method for the Simulation of the Bipolar Charge Transport in Solid Dielectrics .....	286
Continuous Tabu Search for the Corona Loss Calculation of the Double-circuit High Voltage dc Transmission Lines .....	291
Measurement and Interpretation of Radar Cross Section Data in an Educational Setting: A Comparison between Simulations and Experiments .....	297
Single- and Multi-layer Microwave Absorbing Material Based on Conducting Polyaniline and Polyurethane Polymers for Operation in the X-band .....	301
Identification for Wiener Model Based on Improved PSO .....	304
A Circular Multi-conductor Transmission Line Model for Simulation of Very Fast Transient in Circular Windings .....	311
A New Wideband Vertical Transition between Coplanar Waveguide and Coplanar Stripline .....	315
A Novel Configuration of Temperature Compensation in Rectangular Waveguide Resonant Cavities .....	318
Universal Electronically Tunable Current-mode Filter Using CCCIs .....	323
Planar Fresnel Zone Lens Antenna .....	327
Cylindrical DR Antenna Design .....	329
Antenna Pattern Measurement .....	331

Simulation of Induction Cookers with Different Structure and Material Parameters by the Finite Element Software .....	334
Measurement and Analysis of Radiated Electromagnetic Fields around the Pulsed Power Supplies .....	339
Numerical Study of IEEE 802.15.4 Performance .....	344
Analysis of Performance of Unsaturated Slotted IEEE 802.15.4 Medium Access Layer .....	348
Energy-efficient Scheme for IEEE 802.15.4 Compliant Device .....	353
Throughput Analysis of Delayed Acknowledgement over 802.15.3 WPAN with Hybrid ARQ Retransmission .....	357
Comparative Study of MAC Scheduling Schemes for IEEE 802.15.3 .....	362
On the Convergency Properties of Translational Addition Theorems .....	367
SIP-based Mobility Management in HDR System .....	372
MIMO Radar Wide Band Array Range-Angle Imaging .....	377
Development of Circularly Polarized Synthetic Aperture Radar Onboard Microsatellite ( $\mu$ SAT CP-SAR) .....	382
Efficient Interpolation for Range-cell Migration Correction of RADARSAT-1 Data .....	386
Non Stationary Bistatic Synthetic Aperture Radar Processing: Assessment of Frequency Domain Processing from Simulated and Real Signals .....	392
Coded Frequency Shifting Transponder Observation and Identification in Imaging SAR Signal .....	397
Study on Absolute Calibration Coefficient Improvement for ALOS PALSAR Data after Initial Calibration Check .....	401
Robust Adaptive Beamforming under Quadratic Constraint .....	405
A Simple DOA Estimation Employing Second-order Statistics for Distributed Source .....	412
Distributed Sensor Positioning System Using Virtual Trajectories .....	417
Detection of a Dim Point Target Using Dynamic Programming Approach .....	423
A Concurrent Ant Colony Optimization Multipath Forwarding Algorithm in IP Networks .....	426
On Nonlinear Iterative Partial Transmit Sequence for PAPR Reduction in OFDM Systems .....	431
A Concentric Data Aggregation Model in Wireless Sensor Network .....	436
Coaxial Artefact Standard for Specific Absorption Rate 100 kHz to 400 MHz .....	442
Effects of Losses Due to Human Phantoms on 3-dimensional Electromagnetic Field Distribution in Elevators .....	446
Temperature Rise in the MRI Head Models Exposed to Commercial Mobile Phones .....	450
Design of a Broadband Microwave Amplifier Using Fuzzy Logic Performance Data Sheets with a Artificial Immune System .....	454
Design of a Patch Antenna with Integration Cellular Automata and Genetic Algorithm .....	459
A 5 GHz LNA Design Using Neural Smith Chart .....	465
Effect of Edge-preserving Parameters on GPR Reconstruction .....	470
Use GL TM Model Inversion to Detect the Dielectric Parameter .....	475
Multi-parameter Inversion of Electrical Array Lateral-logging by Using the Neural Networks .....	479
Experimental Study on the Role of Water in the TIR Anomaly before Earthquake .....	484
A Novel RSW Antenna .....	489
An Improvement to Decrease the Effect of Handset Internal Components on a Dual Band PIFA Performance .....	493
Design of Thin-membrane Printed Dipole .....	497
CPW-fed Compact Planar UWB Antenna with Circular Disc and Spiral Split Ring Resonators .....	502
Design and Fabrication of Wide Band Printed Multi-ring Fractal Antenna for Commercial Applications .....	506

Analysis of the Multi Surface Current Distributed within in a Broadband Printed Monopole Antenna	511
Divided Two-arms Spiral Slot Antenna fed by Coplanar Waveguide Using the Different Magnetic Phase Different	515
Design of Multi-Band Dual-Polarized Two-Port E-shape Microstrip Antenna	519
A Circularly Polarized Dual-frequency Square Patch Antenna for TT&C Satellite Applications	523
Design and Experiment of a Loop Rectenna for RFID Wireless Power Transmission and Data Communication Applications	528
Design of a Compact Dual-Band Loop-Slot Antenna	532
Power Feeding to RFID Tags Within Specific Distance and Transponder Control Signal	535
Coupling of Transmitting/Receiving Antennas and Super Regenerative Transponder (SRGT) for RFID Tags	538
Calculation of Electromagnetic Wave Attenuation Due to Rain for Various Percentages of Time	541
A 2.4 GHz Low Phase Noise Voltage Controlled Oscillator	546
Novel Super Regenerative Transponder (SRGT) for RFID Tags and ASK signals	551
A Low Cost 1 Watt Doherty Power Amplifier for WLAN and WiMAX Applications	555
Planar Antennas for UMPC Integration	559
WLAN and Bluetooth Antenna Design	562
UMTS and DVB-H Antenna Co-integration	564
Design of Trapezoidal Ring Antenna Using Conductor-backed CPW Structure	567
Design and Implementation of a Smart Antenna Using Butler Matrix for ISM-band	571
The Current Status of Automotive Electromagnetic Compatibility Research	576
A Novel Electromagnetic Bandgap (EBG) Structure for Electromagnetic Compatibility (EMC) Application	581
Antenna Effect Analysis of Laptop Platform Noise on WLAN Performance	585
Optimized ARC Filters Using Goal-lossy GIC	591
Investigation into New Type Piezomagnetic Materials and Acoustical Transducers Exhibiting Piezoelectricity and Piezomagnetic Effect	597
Modal Analysis of an Antenna Feed System for a Multimode Monopulse Radar	601
Calculation of Electromagnetic Wave Logging Response by Using the Numerical Mode Matching Method	607
Analysis of Ridge Waveguide with Claddings of Metamaterials with Zero Index of Refraction	611
A Simple Method to Measure the Unloaded Q of a Transmission-type Resonator	615
Symmetric Unit Cell Models for Composite Right/Left-handed Transmission Lines (CRLH-TL) Metamaterials	619
Analysis and Simulation of Superresolution Image Restoration	622
THz Rectangular Microstrip Patch Antenna on Multilayered Substrate for Advance Wireless Communication Systems	627
Theoretically and Experimentally Investigation of Sparking of Metal Objects inside a Microwave Oven	632
A Congestion Control Algorithm Based on Onboard IP Switching	642
A Broadband Two-stage MMIC Medium-power Amplifier	646
Implementation of a Radio over Fiber System in a Geographically-distributed Optical Network	649
60 GHz Radio over Fiber Transmission System Based on Integrative Cascade MZM	652
Single-mode Modulation Using Injection-locked Fabry-Perot Laser in Radio-over-Fiber System	655
A Scheme of Photonic Notch Filter Using DGD Method for Radio-over-Fiber Communication Systems	658
A Scheme of Microwave Photonic Filter Based on Hi-Bi Fiber	662

The Trend of Designing Rotation Sensors Based on Highly Dispersive Resonating Structures .....	665
Theoretical and Numerical Study of Surface Waves in a Grounded Slab Waveguide of Biaxially Anisotropic Metamaterial .....	672
A New Method for Imaging Avian Based on Frequency-stepped Chirp Signal .....	677
Wind Direction Extraction from Coastal SAR Images Using Cross-spectral Method .....	682
Investigation on Volume Scattering for Vegetation Parameter Estimation of Polarimetric SAR Interferometry .....	686
An Improvement of Vegetation Height Estimation Using Multi-baseline Polarimetric Interferometric SAR Data .....	691
On the Need of Developing Multi-Band Differential POLinSAR Theory and Algorithms for Remote Sensing and Monitoring of Natural Environments and Severe Environmental Stress Changes .....	696
BGP Security Configuration in ISP Networks .....	700
An Iterative QRD-M Detection Algorithm for MIMO Communication System .....	705
Reconstruction of Multi-component Signals Based on Quasi Fourier Transform .....	709
Optimal Adaptive Waveform Selection for Target Tracking .....	715
Adaptive Cooperative Coding in Fast Rayleigh Fading Channel .....	719
MAC Scheduling Schemes and Cross Layer Optimization for IEEE 802.15.3 .....	724
An Optimal ADP Algorithm for Waveform Selection in Cognitive Radar Systems .....	728
Reflection Cancellation from High Speed Transmission Line .....	731
Special Approach for Estimation Ground Target Position in Passive Location .....	736
Studies on Effects of High Power Microwaves in Cell Cultures .....	741
Analysis of Scattering from a Finite Linear Array of Dielectric Cylinders Using the Method of Auxiliary Sources .....	743
GL TM Dielectric Parameter Inversion .....	747
Electromagnetic Modeling of Plasma Etch Chamber for Semiconductor Microchip Fabrication .....	753
Analysis of Electric Field on Liquid Zoom Lens Based on Electrowetting .....	758
The Use of Ray-tracing and Genetic Algorithms to Optimize a Tapered Anechoic Chamber .....	763
An Improved Method of Determining Permittivity and Permeability by $S$ Parameters .....	768
Features and Mechanism of Satellite Infrared Anomaly before Ocean Earthquakes .....	774
Sumudu Applications to Maxwell's Equations .....	779
Dyadic Electromagnetic Green's Function for a Graphene Bilayer .....	785
Open-ended MEMS Probes for Dielectric Spectroscopy of Biological Cells at Radio Frequencies .....	789
SPECAN Azimuth Pre-processing for Bistatic Spotlight SAR Imaging .....	794
Developing Polarimetric GPR System .....	800
Review of GPR Rebar Detection .....	804
The Application of FDTD Method to UHF Electromagnetic Wave Analysis in Gas Insulated Switchgear .....	814
Detection of Pseudo-singularities by Wavelet Technique for Extracting Leaky and Bulk Waves in Piezoelectric Material .....	821
Surface Latent Heat Flux (SLHF) Prior to Major Coastal and Terrestrial Earthquakes in China .....	827
Temperature Dependable Microwave Dielectric Model for Moist Soils .....	831
Monitoring of Satellite Thermal Pattern in the Azores Current Area .....	836
Radiometric Measurements of Maximum Bound Water Fraction in Soil .....	839
New Method of Permanent Scatterers Selection for Changing City .....	844
Time-domain Double Diffraction for UWB Signals .....	848

Coherent Terahertz Smith-Purcell Radiation from a Two-section Model .....	853
Modeling the Electromagnetic Scattering from a Dielectrically Filled Groove Using the Method of Auxiliary Sources .....	858
Analysis of Two-dimensional Scattering by a Finite Periodic Array of Conducting Cylinders Using the Method of Auxiliary Sources .....	861
Single Scattering Properties of Ice Particles in mm/sub-mm Waveband: Effects of Refractive Index and Shapes .....	865
Radio-frequency Characteristics of a Printed Rectangular Helix Slow-wave Structure .....	869
Investigation of the Dielectric-loaded Folded Waveguide Traveling-wave Tube Amplifier .....	874
<b>Author Index</b> .....	878

# Contents

Analysis of the Varying-period Folded Waveguide .....	891
Behavior Study of Simultaneously Defected Microstrip and Ground Structure (DMGS) in Planar Circuits .....	895
Design of 3.1 to 10.6 GHz Ultra-wideband Low Noise Amplifier with Current Reuse Techniques and Low Power Consumption .....	901
The Design of Low Noise Amplifier with Gain-controlled and Low Power Consumption for WLAN Applications .....	906
Design of a SiGe BiCMOS Power Amplifier for WiMAX Application .....	911
A Nut-type Ultrasonic Motor and Its Application on Focus System .....	914
R&D of a New Type Piezoelectric Transformer with a Composite Structure .....	921
Heavy Particle Collection by Ultrasonic Actuator .....	927
Modeling of the Potential Profile for the Annealed Polycrystalline PbSe Film .....	931
Leaky Coplanar Waveguide Antenna with Tunable Beamwidth and Radiation Angle Using Composite Right/Left-handed Materials .....	935
Research on the Robotic Polishing Combined with Electromagnetic Field of Rapid Metal Tool .....	942
Modeling of Thermal-metallurgical Behavior during Hybrid Plasma-laser Deposition Manufacturing ...	946
A Flexible Synchronous Powder Feeder for Electromagnetism Compress Digital Manufacturing of FGM Metal Component .....	954
Research on Relationship between arc Length and arc Voltage in the Plasma Deposition Manufacture Process .....	959
Research of Electromagnetic Effects on the Compound Arc Beam in the Hybrid Plasma-laser Manufacturing Process .....	964
Multi-axis Path Planning for Electromagnetic-compressed Plasma Deposition Manufacturing Based on STL Format .....	970
Integrated Robotic Plasma Spraying System for Advanced Materials Processing .....	974
Numerical Simulation of Electromagnetic Flux Leakage in Application of Internal Defects Prediction of Metal Parts .....	979
Influence of Calcium Cyclotronic Resonance on the Developmental Rates of <i>Xenopus Laevis</i> Tadpoles ..	983
Electromagnetic Mapping of Urban Areas: The Example of Monselice (Italy) .....	988
Charge Moment Tensor and the Rotation Equation of a Charged Rigid Body in a Uniform Magnetic Field .....	993
Natural Introduction of Charge Moment Tensor and the Lagrangian of a Rotational Charged Rigid Body .....	997
Simplified Variational Principles for Barotropic Magnetohydrodynamics .....	1003
Semi-analytical Approach for a Specific Microstructured Fiber .....	1008
An Analytical Solution for the Logarithmic Singularity Associated with MoM Applied to Dielectrics and MFIE and Its Optimal Evaluation with Polynomial Quadratures .....	1014
Non-radiating Field Wave Scattering from Discontinuities in Planar Surface .....	1020

Relativistic High Harmonics Generation in Underdense Plasma Produced by a Super Intense Femtosecond Laser Pulse .....	1025
High Harmonic Generation in Magnetic Underdense Plasma .....	1030
Applications of Silicon-based Photonic Crystal .....	1033
Focusing Properties of Radially Polarized Beam with Radial Cosine Phase Wavefront .....	1036
Investigation of Slow Wave Structure with Metal PBG Structures .....	1041
Transmission Characteristics of Electromagnetic Waves in Plasma Photonic Crystal by a Novel FDTD Method .....	1044
3D FDTD Method Analysis of Light-beam Scattering from a RAD-MSR Disk Models .....	1049
Application of Laser Plasma Source with a Gas-puff Target in Calibration of Extreme Ultraviolet Detectors .....	1055
Electromagnetic Modes in Hybrid Periodic-non-periodic Dielectric Porous Silicon Multilayers .....	1059
Study on the Influence of the Incidence Direction on the Photonic Band Gap in Porous Si-based Dielectric Heterostructures .....	1063
Improved Property in Inverted Bottom-emission Organic Light-emitting Diodes Using 8-Hydroxyquinolinolatolithium Layer .....	1068
Analysis of the Injection Layer of Liq in Inverted OLEDs Using Atomic Force Microscopy and X-ray Photoelectron Spectroscopy .....	1073
Low Cost 1 × 2 Acrylic-based Plastic Optical Fiber Coupler with Hollow Taper Waveguide .....	1079
Analysis of a New Measurement for Electromagnetic Field with Polarization Information of Fiber Grating .....	1083
Optoelectronic Sensor for NO <sub>x</sub> Detection .....	1088
Continuum Electronic Bound States in Rectangular Quantum Wells and Barriers .....	1093
Scanning Tunneling Microscope Studies of Co Growth on the Ru(0001) Surface .....	1097
Childhood Leukemia Risk Due to High Voltage Transmission Line in Tehran — Iran .....	1103
Electromagnetic Pulse Alter Permeability of the Blood-brain Barrier in Rats .....	1106
The Research on the Harm of Biological Effect of Mobile Phone Radiation to Human Body .....	1109
Suppression of Static Magnetic Field in Diffusion Measurements of Heterogeneous Materials .....	1114
Compensating the Effect of Static Magnetic Field in MR Measurement of Diffusion .....	1119
Wavelet Filtering and Level Set Segmentation of NMR Images for Monitoring the Development of Growing Cultures .....	1124
Perimeter Measurement of Spruce Needles Profile Using MRI .....	1128
Characterization of Acetylcholine Hydrolysis under Continuous and Pulsed Microwaves Radiation Using Broadband Dielectric Measurement .....	1132
Effect of Seed Pretreatment by Magnetic Fields on Seed Germination and Ontogeny Growth of Agricultural Plants .....	1137
Effect of Magnetic Fields on Growth and Antioxidant Systems in Agricultural Plants .....	1142
The Weak Combined Magnetic Fields Reduce the Brain $\beta$ -Amyloid in an Animal Model of Sporadic Alzheimer's Disease .....	1148
Weak Combined Magnetic Field Accelerates Hydrolysis of $\beta$ Amyloid-Protein <i>in vitro</i> .....	1153
Electromagnetic Wave Absorption in K Band and V Band with Carbon Microcoils .....	1156
Computer Simulation of Emission Spectra in Plasma Generated by an Alternating Electric Field .....	1161
Terahertz Science and Technology and Applications .....	1166
Influence of Shielding in Asymmetric Planar Structures for MMICs Applications .....	1171
Electronic States in Mixed Cantor-like Potentials .....	1177
Eigenvalues and Eigenfunctions in a Cantor-like Potential .....	1181

Relative Mobility and Relative Conductivity in ALD-FET (Atomic Layer Doped-field Effect Transistor) in GaAs .....	1186
Design of a Novel Wideband Planar Inverted-F Antenna for Mobile Applications .....	1191
Interaction between Two Photorefractive Bright Solitons in Different Dimensions .....	1196
Structural and Magnetic Properties of Mn Implanted GaN .....	1199
Virtual Antenna Method as Applied to the Study of the Scattering by 2-dimensional Non-linear Meta-materials .....	1204
Coupling of Terahertz Surface Plasmon Polaritons in Corrugated Stacks of Dielectric and Semiconductor .....	1208
Advancements in Active Multimodal Microwave (SAR) Remote Sensing .....	1212
Target Detection beneath Canopy Using PolSAR Images .....	1216
An Inverse Model for Sea Ice Thickness Retrieval Using Active Microwave Remote Sensing .....	1220
Monitoring Crop Phenology with MERIS Data — A Case Study of Winter Wheat in North China Plain	1225
Passive Microwave Remote Sensing for Sea Ice Thickness Retrieval Using Neural Network and Genetic Algorithm .....	1229
Interpolation Techniques to Improve RIO Boundary Detection .....	1234
A Microwave Scattering Model for the Remote Sensing of Oil Palm Plantations .....	1239
EM Scattering from Multiple Cylinders .....	1243
Analysis of the Electromagnetic Properties of High Impedance Surfaces Using Genetic Synthesis .....	1248
Meander-line Antenna Design for UHF RFID Tag Using a Genetic Algorithm .....	1253
A Miniature Chip Antenna Design for a Passive UHF RFID Tag to Be Built in a Portable Device .....	1257
A Metal Tag Antenna for Passive UHF RFID Applications .....	1261
Dual-frequency Balanced Mobile Antenna for WLAN and Short Range Communication Systems .....	1264
Enhanced-bandwidth PIFA Antenna with a Slot on Ground Plane .....	1268
Design of Multi-band Antenna Using Different Radius Wires .....	1273
Balanced MIMO Antenna for Mobile Phones .....	1277
Design of RFID Reader Antenna for Exclusively Reading One Single Tag .....	1281
An All Optical XOR Logic Gate for NRZ Based on TOAD .....	1286
Ultra-low Power Frequency Conversion in Two-photon-absorption Free Micro Ring Resonator .....	1291
Highly Birefringent Hybrid Photonic Crystal Fiber .....	1295
Efficient Generation of Cascaded Four-wave Mixing in Very Short Optical Fibers .....	1298
High Performance, Low-loss Nonlinear Integrated Glass Waveguides .....	1301
Birefringence Vector Computation and Measurement for Fiber with Polarization Dependent Loss .....	1305
Spectrum Property of 6.5 W Multi-mode Output Laser Diode .....	1309
Evolution of Beat Signal in a Nonlinear PCF Considering the Stability of the Light Source .....	1313
Investigation on Traffic Grooming of OPS Edge Node Base on FDLs .....	1317
Three-dimensional Surfaces of Inorganic Materials Fabricated by Femtosecond Laser Lithography .....	1322
Integral Equations for 3-D Scattering: Finite Strip on a Substrate .....	1326
Computational Parameters in Simulation of Microscope Images .....	1330
<i>E</i> -polarized Diffraction Coefficients of a Composite Wedge Composed of a Perfect Conductor and a Lossy Dielectric .....	1335
A Physical De-embedding Method for Silicon-based Device Applications .....	1339
Thermal Conductivity of Nanofluid with Magnetic Nanoparticles .....	1344

On the Use Complex Susceptibility Measurements in Investigating the Field Dependence of Resonance and After-effect Function of Nano-particle Colloids .....	1348
CFD Simulation of Gravitational Sedimentation and Clustering Effects on Heat Transfer of a Nano-ferrofluid .....	1352
Electronic Properties of Quantum Wells Structures with Gaussian Potential Profiles .....	1357
Total Density of States in Rectangular Quantum Wells .....	1361
Scattering Parameters Measuring Technology Research on Two-port Surface Mounted Device .....	1364
A Ka Band LTCC-based Small Encapsulated Transceiver Module .....	1368
HFSS <sup>TM</sup> Modelling Anomalies with THz Metal-Pipe Rectangular Waveguide Structures at Room Temperature .....	1372
High-speed I/O Buffer Modeling for Signal-integrity-based Design of VLSI Interconnects .....	1383
Near Field Imaging of Synthetic Aperture Radiometer .....	1387
A Method to Estimated Winter Wheat Yield with the MERIS Data .....	1392
VLF Sferics Propagating in the Earth-ionosphere Waveguide .....	1396
A Roadmap for Detecting Extraterrestrial Intelligent Life .....	1400
Analysis of Collided Signal Waveform on the Long Transmission Line of UART-CSMA/CD Control Network .....	1404
Recognition of Wavelength-multiplexed Labels with Acoustooptic Waveguide Circuit for Hierarchical Photonic Routing .....	1410
Design and Development of A FMCW Ground Based Imaging Radar System .....	1415
Design and Development of a Low Cost Chirp Generator for Airborne Synthetic Aperture Radar .....	1419
Electromagnetic Scattering Theory of Car Body Imaging Using Scanning Millimeter Wave Radar .....	1423
FDTD Analysis of Electromagnetic Wave Propagation for Out-door Active RFID System .....	1429
The Effect of Shorting Post on Axe-shaped Circular Antenna Miniaturization .....	1434
Microstrip Slot Antenna with a Finite Ground Plane for 3.1–10.6 GHz Ultra Wideband Communication	1438
Centerline Longitudinal Shunt Slot Excitation by Parabolic Shaped Single Ridge Waveguide .....	1442
Planar Antenna Array Mutual Coupling Identification: A Direct Method Applied to Quasi-Yagi Elements .....	1446
Study of High $T_c$ Superconducting Microstrip Antenna .....	1451
Directivity Enhancement of Microstrip Patch Antennas Using a Dielectric Superstrate .....	1455
The Calculation of Back Scattering Field of Unmanned Air Vehicle .....	1460
Estimation Error of Topographic Phase Based on RVoG Model Using POLinSAR Data .....	1464
Ferrite Image Lines Studies by Transverse Operator Method .....	1469
A Localization Scheme Using Bi-directional Metrics Joint Estimation .....	1473
Propagation of Ultra Wideband Signals in Automotive Environment .....	1478
A Simplified Statistical Modeling of Radioclimatological Parameters for LOS Links in South Africa ..	1483
Regular Polyhedron Antenna Array Design and Simulation for MIMO Systems .....	1487
A Source Localization Scheme Based on Unitary ESPRIT and the City Electronic Map .....	1491
Performance Analysis of OFDM Communication System over Correlated Nakagami- $m$ Fading Channel	1495
Technical Equipment for Research of EM Field and Biological Systems Interactions .....	1499
Microwave Medical Imaging and Diagnostics .....	1504
Reversible Electroporation on a Microchip .....	1509
Wideband Differential Phase Shifters Using Waveguides Filled by Inhomogeneous Dielectrics .....	1513
The Design of Triple-Mode Low Noise Amplifier for SDR System .....	1517

Unconditional Stability Criteria for Microwave Networks .....	1524
A Low Cost and High Performance Design of X-band Short Range Doppler Radar Transceiver .....	1529
Photonic Crystal Based Subwavelength Imaging and Cloaking Optical Devices .....	1534
Broadband Acoustic Cloak with Multilayered Homogeneous Isotropic Materials .....	1539
Pulse Electromagnetic Sounding of the Permafrost Layered Medium .....	1543
Evaluation of Scattering in Collision Avoidance Radar Application .....	1546
Monitoring of Satellite Thermal Patterns of Warm Core Ring in Subarctic Sea Surface .....	1551
Monitoring of Satellite Thermal Patterns of Ocean Front Evolution in Relation to Ocean Water Stratification .....	1554
Coupling the CUPID and TRGM Models to Study the Temporal Variations of Thermal Emission Directionality of Crop Canopies .....	1558
Ray Tracing of CMP Antenna Array GPR System .....	1563
FDTD Analysis of Spatial Filtering of Scattered Waves for Optical CT of Medical Diagnosis .....	1567
FDTD Analysis of Microwave Propagation and Scattering Characteristics over Forests for WiMAX Wireless Communications .....	1573
An Accelerated Frequency Domain Ray-tracing Simulator for Ultra-Wideband Communications .....	1579
Experimental Study of Atmospheric Turbulence Effects on RoFSO Communication Systems .....	1584
Soft-lithography-based Inter-chip Optical Interconnects .....	1590
FDTD Simulation for Statistical Properties of Microwave Scattering and Attenuation Due to Randomly Distributed Rainfalls .....	1595
Research and Application on Scattering Matrixes of the Radar Target under Different Polarization Bases .....	1601
Air Gap Tuning Effect on the Resonant Frequency and Half-power Bandwidth of Superconducting Microstrip Patch .....	1605
Radiation Characteristics of a Wideband Triangular Antenna for Wireless Communications .....	1610
Characteristics of a Multi-bandwidth Gear Microstrip Antenna Using a Taper for Feeding .....	1615
Design and Analysis of Coplanar-waveguide-fed Dual-band Antenna by FDTD .....	1620
Design of an Optimum Antenna System for Maximum Power Transfer Using Statistical Design of Experiment Approach .....	1624
Renormalization Group Application to Multi-port Model for Studying Fractal-shaped Structures' Diffraction .....	1629
Input Impedance of Gap-coupled Circular Microstrip Antennas Loaded with Shorting Post .....	1634
UWB Rectangular Ring Microstrip Antenna with Simple Capacitive Feed for Breast Cancer Detection .....	1639
Multiband Rectangular Ring Microstrip Antenna for UWB Wireless Applications .....	1643
Effective Electromagnetic Media for FDTD-PIC .....	1647
Solving Guided Wave Modes in Plasmonic Crystals by Interfacial Operator and Coupling Interface Approach .....	1652
Extraction of Complex Permittivity of Multilayered Dielectric Sample Loaded in a Rectangular Waveguide .....	1657
Parallel Electric Field Integral Equation Solver for Arbitrary Shaped Conducting Bodies .....	1661
Improvement of Particle Swarm Optimization .....	1667
An Improved Adaptive Finite Element Method for the Simulation of Electromagnetic Field .....	1671
A Domain Map Finite Element Method for Solving Open Boundary Electromagnetic Field Problem and Its Application .....	1676
Study of Optical Propagation in Hybrid Periodic/Quasiregular Structures Based on Porous Silicon .....	1681
Magnetic Proximity Effect in Isolator Crystal Pairs .....	1685

New Measuring Method of Examination of Planar Optical Waveguides .....	1689
Time-domain Analysis of Wideband Optical Pulse SHG in Layered Dispersive Material .....	1694
Intense Terahertz Radiation from GaAs Photoconductive Antenna Array .....	1698
Electromagnetic Radiation from Organic Light-emitting Diodes .....	1702
Fourth Order Moment Statistical Characteristic of the Laser Pulse Scattering on One-dimensional Random Rough Surface .....	1708
Investigation of Novel Ultrasonic Positioning Method Installed in Sensor Network .....	1712
Wireless Sensor Networks in Agriculture: Cattle Monitoring for Farming Industries .....	1719
Time Table Transfer Time Synchronization in Mobile Wireless Sensor Networks .....	1724
Performance Analysis of Unsaturated Slotted IEEE 802.15.4 with Downlink and Uplink Traffic .....	1729
Separation of Detection Authorities (SDA) Approach for Misbehavior Detection in Wireless Ad Hoc Network .....	1733
Optimal Power Allocation Algorithm for AF BAT Relaying .....	1738
A Compact and Low Loss V-band Lowpass Filter Using Coplanar Waveguide Structure .....	1743
Introduction to the System-level Susceptibility Assessments for HEMP and HPEM .....	1746
A Viewpoint of Time Variant Dielectric Effect in Vital Sign Detection Using Microwave Radar .....	1751
A Compact 5.8 GHz Rectifying Circuit Design and Experiments .....	1756
Parallelisation of Implicit Time Domain Methods: Progress with ADI-FDTD .....	1760
An Improved GE's Method for Calculating Green's Functions in the Shielded Multilayered Structure .....	1764
<b>Author Index</b> .....	1767
